WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Legs: two 843 mm lengths of 28 x 1.5 mm tube.

Grip: 520 mm of 32 x 1.5 mm tube.

Lay out on the bench: leg feet 560 mm apart, leg tops 480 mm apart, meeting the grip 20 mm in from each grip end. Fish-mouth the leg tops to the grip and weld.

Each leg drops into a socket on the rail end, 30.5 degrees up from level; mark the leg 115 mm from its foot and drill 8.5 mm across it with the leg in the socket, through the socket's pin hole.

Quick-release pins hold the handle; pull them to take it off.

Grip 900 mm above the ground, 1,270 mm from the deck centre.

Check: the handle drops in and out of both sockets without forcing.

FIELDCELL
