P1	Making sketch for the prototype build plan	2026-10-01	AC

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 1,200 mm lengths of 20 x 20 x 2 mm angle; deburr.

Upright leg: four 5.5 mm holes 11 mm down from the top, at 60, 420, 780 and 1,140 mm from one end, to match the frame tabs.

Flat leg (top): 4.5 mm holes every 150 mm, 10 mm in from the outer edge, for the hinge screws; countersink from the top.

Fit: upright leg flat on the outside of the four tabs, top of the flat leg 494 mm above the ground, flat leg pointing outward.

M5 bolts through the tabs, nyloc nuts inside.

The hinge's fixed leaf lies on the flat leg; its knuckle (the pin) overhangs the angle's edge by 7 mm.

Check: angle top level and straight within 1 mm along its length.
